SAIC has reviewed the Final Draft Sampling and Analysis Plan for the PCB Removal Project, dated June 1995. SAIC does not have any comments on this document. The request by EPA to use EPA Method 4020 for the confirmation sampling and EPA Method 8080 for the verification sampling, was incorporated. The document is well written, accurate with respect to regulations, and presents the PCB Removal Project in proper detail.

If you have any questions, please call me at 273-1277.

Sincerely,

Eric A. Dillé
